Oracle Edge Database Solutions

Embed More Power. More Performance. More Possibilities.

Advanced data management services are becoming a must for today's embeddable applications, bringing enterprise-class features and functionality to a diverse array of hardware and software products.

From cell phones to storage devices, these products are achieving new levels of performance that are able to meet customers' increasingly specific demands—and leave competitors' offerings in the dust.

Only Oracle—the market leader in data management services—offers a full range of embeddable, "edge" databases for developers building applications that must run without human intervention.

POWERED BY ORACLE Build a reputation for excellence. Let your customers know your devices are Powered by Oracle.

Choose the product that best meets your needs:

Discover extreme database performance in an embeddable package.
